Subject: FW: Revised Petition Pursuant to 40 CFR 60.2115
Attachments: COR-13-053 Pogo CISWI Performance Test Operating Limits Revised Petition.pdf

Hi, I just received this. I haven't had time to look at this yet, but it looks they think they can proceed without controls, because that is the only time this petition would be called for.

Zach and John, are you available during the times they suggest for a meeting.

Stef, I am thinking that it would be good to have you on the phone for the meeting they are requesting to discuss technical details, if you are willing.

Toni, would you be interested if the timing works for you?

Shirin, they say they would like to follow up with a counsel meeting after the technical meeting. The first day could work for you but the second would not. If it doesn't work for you to be there, I will tell them we may need to follow up with a call. I think we would still hold off on talking to John Keenan until we find out if they say they will need until next year to comply.

Can anyone think of anyone else I should try and include in the meeting with Pogo?

Heather,

Attached is Pogo's revised Petition. A hard copy will be certified mailed to the Director tomorrow.

Pogo would like to set up a meeting with you in Seattle. Would August 22 or 28 work?

The purpose of the meeting would be to present the results of our first incinerator stack test and discuss options for controls.

Both our stack test contractor and AQ specialist could be present. Therefore the focus would be technical discussion.

If needed, we'd like to follow up with a brief meeting with counsel to discuss Pogo's path forward.

Please give me a call if you wish to discuss.
